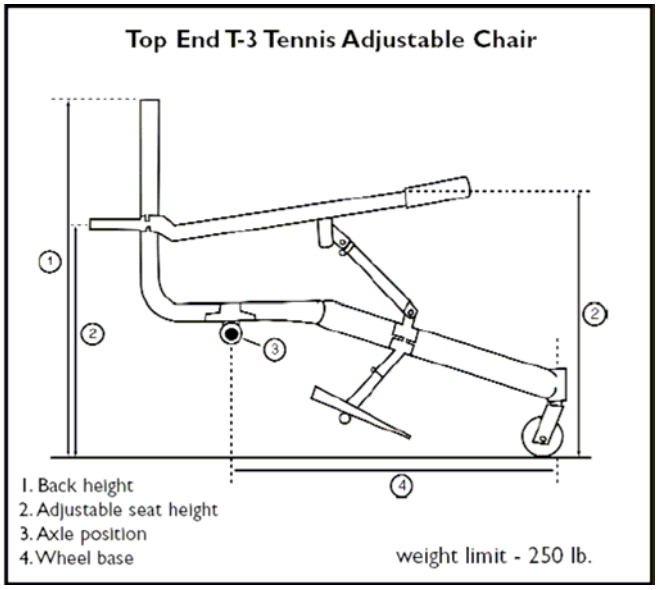
[5] Kenda tires are available in 24", 25" and 26" sizes.

Top End® T-3™ Tennis Adjustable Wheelchair

Measuring Guidelines



Top End T-3 Tennis Adjustable Chair
1. Back height
2. Adjustable seat height
3. Axle position
4. Wheel base
weight limit - 250 lb.

Seat Width – Measure frame outside to outside in 1" increments.

Seat Depth – Measured by the length of upholstery from the front of the seat sling to the back post. Standard is 15" – but is available from 12" to 17".

Seat Rail Extensions – Extensions are fixed. Standard length is 3" and is measured from the edge of the seat upholstery.

Adjustable Seat Height Front/Rear – Floor to top of tube in the front and rear respectively front range adjusts from 15" – 21", rear 13.5" – 17". High level injuries prefer more drop in the seat and lower injuries less. The drop adds balance, security in the seat and better positioning for high injuries.

Back – Available as fixed or folding. An adjustable backrest height of 11" – 14", 14" – 18" or 16" – 20" is available to accommodate rear seat height adjustment.

Wheelbase – Standard is 24". 26" is available for those needing stability, extra leg room and for daily use. The wheelbase is measured from the axle to the center of the front fork. With the adjustable axle position, the point of reference is measured 3" from the front of the back post to the center of the front fork.

Axle – The adjustable axle is best for those unsure of their optimum axle, position, but is also good for those who might want to use the T-3 for other activities. Minor adjustments can be made w/adjustable back upholstery and foot placement.

Top End® T-3™ Tennis Adjustable Wheelchair

Measuring Guidelines

Camber – Camber is used to describe the amount of angle in the rear wheels. Camber gives the user more stability and allows the chair to turn quicker. The camber is fixed on the T-3 Adjustable and is available in 12, 15, 18, and 20 degrees. An extra camber tube can be ordered for customers who want to try more than one camber.

An optional camber system offers a choice of two camber inserts and is preferred by customers who want quick access to change their camber. The adjustable camber system is offered in camber of 0, 3, 6, 9 and 12 degrees.

Footrest – The footplate system is adjustable in foot angle and also forward and backwards. Vertical footplate adjustment is multi-adjustable and also can be angled for full foot contact and comfort.

Rear Wheels – Standard size is 24" (25-540). For customers who want to push more wheel the 25" (25-559) is available. Double wall rim and high flange hubs are standard which are great for sports enthusiasts. A 22" (25-520) is available for small or short individuals. High pressure tires are standard.

Front Wheel Size – The standard is a 3" solid in-line wheel.

Options – Sport and everyday options are available.

Color Selection – See Color Selection Guide for details.
